**Subject:** DCIF : commitment to Nation

Subject: Introduction and offer of support for the Telecom R&D in India initiative

Respected Prof. Ajay Kumar Sood,

Greetings from Digital Communications India Forum (DCIF), a unit of PTC India Foundation. DCIF is a membership-based, apolitical non-profit dedicated to promoting awareness, policy dialogue, and informed contributions to India's telecommunications and digital communications ecosystem.

We are writing to convey our appreciation for the vision of the Office of the Principal Scientific Adviser in advancing India's science, technology, and innovation priorities, including the new focus on Telecom R&D in India. The office of the PSA plays a central role in advising the Government of India on science and technology matters, and we understand that this initiative is intended to strengthen India's research and innovation ecosystem.

DCIF would be privileged to contribute to this national effort by offering our domain knowledge, industry network, and policy experience to support dialogue on telecom research, indigenous technology development, standards, and ecosystem-building. Given our longstanding engagement with telecom policy and stakeholder consultation, we would welcome the opportunity to collaborate in a manner that complements the Government's broader R&D and self-reliance goals.

We would be grateful for an opportunity to introduce DCIF and share how we may support this initiative through expert consultations, policy inputs, and industry engagement. Please let us know a convenient time for a brief meeting or discussion.

With respectful regards,

Anil Kumar Jain  
President
